Summary

With **5years** of experience as a Full Stack Engineer, I've sharpened my skills in utilizing **JavaScript** frameworks to build adaptable web applications that meet the diverse needs of communities. Throughout my professional journey, I've actively participated in every application development life cycle phase, starting from the initial concept and extending to customization based on customer requirements. Ensuring seamless communication within the development team has always been my priority. In my past experiences, I have contributed applications from different industries, including Retail, Real Estate, and Health Tech.
